the BLOCKCHAIN team

Overview

HELLO,

The world today is changing faster, more unpredictably and with greater shifts than at any other time; politically, socially, technologically, economically. With change comes disruption, with big change comes big disruption. Blockchain is one such paradigm shift in technology.

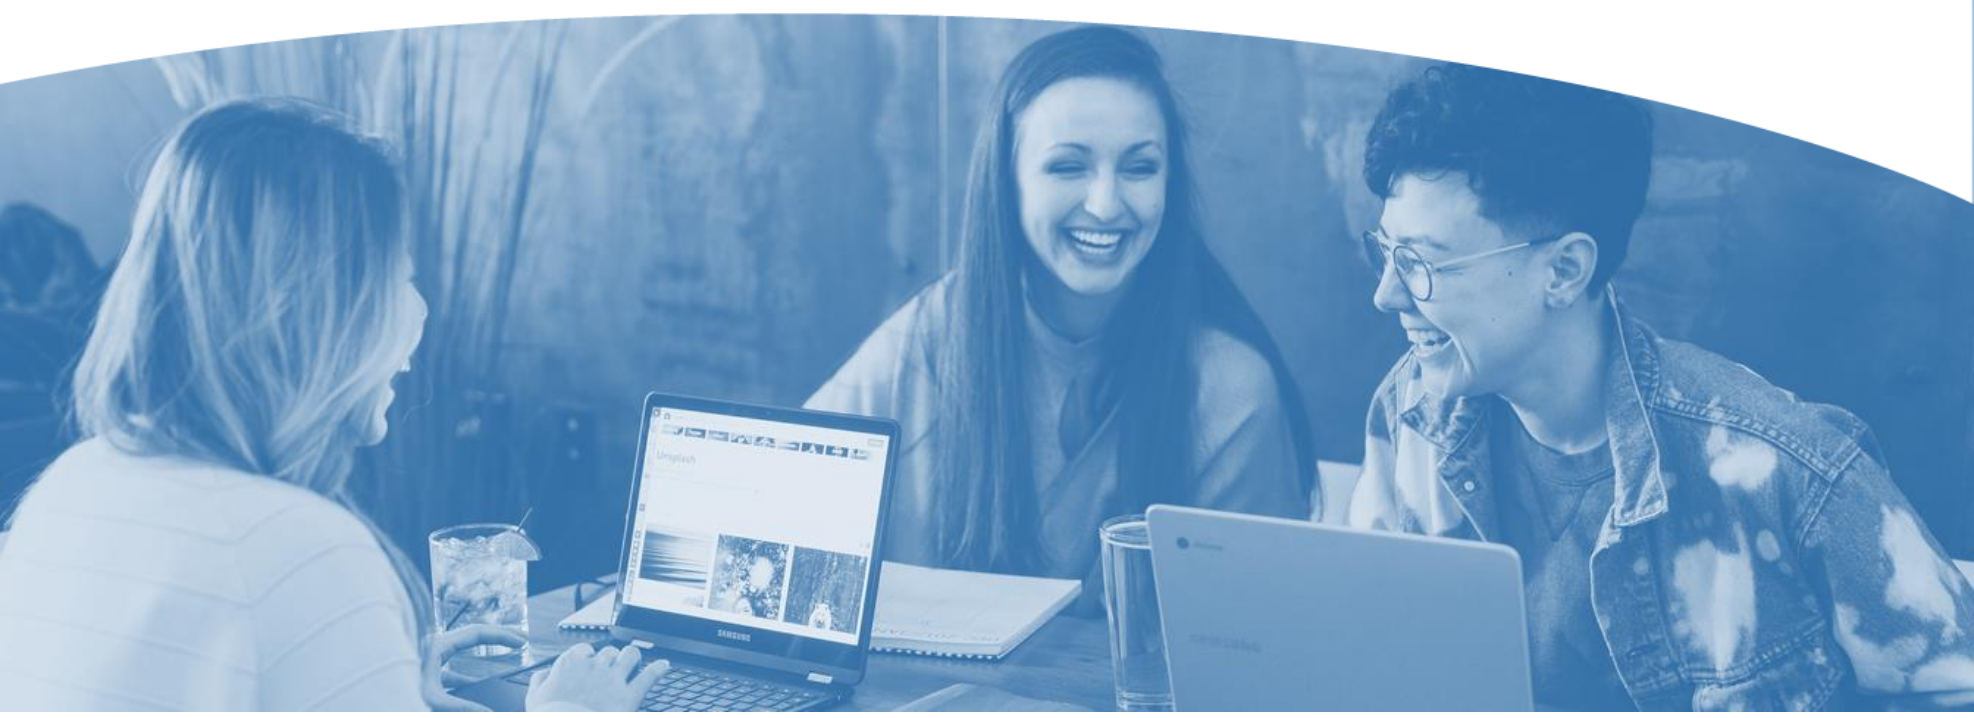

Blockchains bring to people the power to control data without the middlemen and cuts their service costs. Blockchain, is the biggest innovation in computer science—the idea of a distributed database where trust is established through mass collaboration and clever code rather than through a powerful institution that does the authentication and the settlement.

TBT provides a one stop shop for technical expertise, developers and industry experts to help and assist companies and governmental organizations to adapt blockchain OR build scalable blockchain solutions. We help enterprises and organizations leverage the decentralized network, built solutions on blockchain and introduce a new level of transparency, efficiency and automation into business processes.

Our Blockchain Experience

the BLOCKCHAIN team

- Over the last 3 years, we have got a considerable experience in building blockchain based applications.
- We have inhouse team of blockchain developers.
- We started with building a peer to peer crypto exchange in 2017, similar to the very popular exchange localbitcoins.com
- We have worked on NFT platform
- We have worked on Defi – lending platform
- We have worked on a crypto-investment and staking project
- We are currently working on a decentralized social network based on HIVE/STEEMIT blockchain

Reach out to us --

- To understand how blockchain can transform your business
- To raise funds via ICO's
- Launch your own crypto currency token
- Develop decentralized applications
- Develop Smart contracts
- Launch Crypto Exchanges (order book, peer to peer)
- Develop NFT (non-fungible, semi-fungible tokens)
- Dedicated blockchain developers

GLOBALVOX

Technologies

Hyperledger : Private, permissioned enterprise blockchain solutions for businesses

Solidity : Highly-compatible smart contract-based decentralized applications (dApps)

BitCoin : Bitcoin based applications based on BitCoinJ (java based BTC library)

Steem : Decentralized Social Networks based on Steem Blockchain

BSC : Decentralized apps based on Binance Smart Chain

ERC20 : Ethereum based token development for any business case

ERC-721, ERC-1155, ERC-998, and TRC-721 : NFT Development

MOVE Development : Sui Blockchain, APTOS Blockchain

RUST Development : Solana Blockchain

Ethereum, Polygon and all EVM compatible chains

Recent Projects

the BLOCKCHAIN team

The BiG Deal

A decentralized blockchain based auction house – for winning amazing products / services / digital assets / nft's / experiences and even tokens

Technology : Solana Blockchain, Multichain

BiG DEAL

Lexeon

MLM application with smart contracts written in solidity (ERC20), audits and complete business logic for a Miami based - Lexeon.

Technology : Ethereum blockchain

LEXEON

Solster Finance

A IDO launchpad for Solana blockchain projects

Technology : Solana blockchain

solster

SCRO – Professional, secure escrow services

A non-custodial escrow platform for businesses – supporting Solana, Ethereum and Sui Blockchain

Technology : Solana, Sui, Ethereum

$ SCRO

Professional Secure Escrow Services On Blockchain

Green Universe Coin GUC

GUC is a platform to invest into green projects across the globe using their $GUC tokens. Investments can be converted to NFT of their carbon credit certificates.

Technology : Binance Smart Chain

Ruptok

Gold backed lending platform with NFT's on Polygon

Technology : Polygon

RUPTOK

Recent Projects

the BLOCKCHAIN team

Crading

A peer to peer cryptocurrency exchange.
Has a robust ESCROW system built into the exchange.

Technology : Bitcoin Blockchain (BitcoinJ)

CRADING

WaterQuest ICO

A water coin was launched under this ICO. WaterQuest is an award winning company trying to provide real liquidity across the world. Think liquidity as WATER.

Technology : Ethereum blockchain

WaterQuest Hydroresources

OOPS

A decentralized social network for IT professionals and IT organizations. The vision is to have all entities in the IT space to be part of this unique network where anyone who brings in value to the network will be rewarded by OOPS coins.

Technology : STEEM blockchain

OOPS

IndoSwiss Blockchain Alliance

ISBA exists to promote and foster an eco-system for Blockchain technologies by sharing best practices from Switzerland/EU to India and to assist the Indian Blockchain companies to establish their Swiss/EU footprints. Several projects have been consulted by GlobalVox under this alliance.

Indo Swiss Blockchain Alliance

NFT Agency

A marketplace for NFT's to buy, sell, list, lease NFTs.

Technology : Ethereum

NFTagency
